GAS BELOW THE STANDARD.

The Poor Quality Furnished and the Excuse of the Company.

Mr. George A. McIlhenny, president and engineer of the Washington Gas Company, in answer to a communication from the engineer's office of the District, says: "I cannot give a satisfactory reason why the gas sent out by the company on the night of the 15th should register only 14.31-100 candles as the effect of the inspector. Our gas has frequently of late been reported below standard, consequently we have been more careful and attentive, but it would seem that this has not been entirely successful in preventing the difficulty."

Mr. W. H. Bailey, inspector of gas and meters for the District, writes to the engineer's office: "That while the gas company cannot give a reasonable excuse for the low standard of the gas on the 15th, I think that they should be compelled to keep within the limit of the law by keeping above standard."
